**IMPORTANT NOTE:** Machine Model Numbers with "-DA" suffix will require TWO (2) Kits, because SC Series machines have independent sides.

The **SC-Conversion Kit** provides a total conversion for aging and problematic System 500/600 series bill validators and stackers. These conversion kits allow customers to keep their secure cabinet installed and continue to use the direct-drive System 600 series hoppers, while incorporating a downstacker CPI/Mars bill validator with 500 bills stacker. In order to accommodate the SC-Conversion Kit, customers will remove the old System 500/600 bill validator and separating bill stacker devices. The kit includes all the mounting brackets, cables, hardware and instructions needed to install the new bill acceptor and connect to the new SC-Conversion Controller.

The SC-Conversion Controller has the same menu-driven system with LCD display for programming, diagnostic and audit reporting functions found in the Sys500 Keyboard and Sys600 Data Terminal. In addition, the SC-Conversion Controller has an Ethernet port that allows owners to connect to their internet router and program the machine to send daily audit reports, out of service alerts, or low level alerts via SMS text or email to up to six addresses.

SC-Conversion Kit includes: External & Internal Steel Cover Plates, Internal Steel Bill Acceptor Mounting Bracket, Choice of Mars bill acceptor (if needed), SC-Conversion Controller, 24vDC Power Supply for Controller, Universal MDB Bill Acceptor Cable, 28v "Out of Service" Indicator Light with cable, Installation Hardware and Instructions.
